Welcome!
Let's get started by installing the needed CLIs, setting up your first private registry namespace, and pushing your first image.
Install, Set Up, and Log In
1. Install the IBM Cloud CLI.
2. Install the Docker CLI.
3. Install the Container Registry plug-in.
ibmcloud plugin install container-registry -r 'IBM Cloud'
4. Log in to your IBM Cloud account.
ibmcloud login -a https://cloud.ibm.com

IBM Cloud Command Line Interface - InstallShield Wizard
Welcome to the InstallShield Wizard for IBM Cloud Command Line Interface
The InstallShield(R) Wizard will install IBM Cloud Command Line Interface on your computer. To continue, click Next.
After the installation is complete, you can get started by opening a command prompt and entering "ibmdoud".
For usage and a list of available commands, enter "ibmdoud help".
To get help on a particular command, enter "ibmdoud <command_name> --help".
For example:
ibmdoud login --help
